

Bambang Adhitya

Programmer, Developer

Work Experiences

React-Native Developer / PT. Dwimitra Raya Sejati Jakarta

Since November 2019

PT. Dwimitra Raya Sejati is a company's part of KIOSBANK GROUP, engaged in online payments.

I joined PT. DRS for (Confident) project.

My works is:

- Create Screens and logics to apps.
- Connecting Restful-API to apps.

Ionic Developer / PT. Bertiga Mitra Solusi Jakarta

From August 2018 to September 2019

PT. Bertiga Mitra Solusi is a company providing goods and services. Some of the projects are:

- Procurement of goods for the airport, a request from PT Angkasa Pura II
- Creation of a Mobile Application for Immigration.
- Etc.

I work on several applications for Immigration:

- Antrian Paspor Online (Public): Application for the public to make passports online by means of ordering a seat at a user-specified time and date.
- Laporan Harian Imigrasi (Internal): Application for reporting activities in immigration.
- Pengawasan Keimigrasian (Internal): Application to monitor immigration related issues.

Ionic Developer / PT. Integrasi Media Kreasi Jakarta

From April 2017 to July 2018

PT. Integrasi Media Kreasi (eKreasi) is an application vendor for several well-known insurance companies such as BFI, Sun Life, AXA, etc.

I work on several mobile applications using Ionic:

- Sun Life eLearning: Application to make it easier for new agents to learn everything about the agency at Sun Life.
- AXA eRecruitment: Application for recruiting new agents, including eLearning too.

Application Service / PT. Fujitsu Indonesia Jakarta

From December 2016 to February 2017

At Fujitsu, I worked on a project for a government agency, KPPPA, the project that I worked on was SIGA (Sistem Informasi Gender dan Anak). In my project, I am tasked with making a dashboard using the Splunk application as a data provider, and Tableau as the dashboard maker.

Work Experiences

Developer / [PT. Sandika Cahya Mandiri](#) Jakarta

From December 2015 to November 2016

My first work experience was in this company.

- Beginning my work working on the Web Chat program using PHP
- Then my coworkers start learning Javascript to enhance the appearance of the SPA (Single Page Application) web
- After Web Chat was finished, I started working on the Back-End migration project that used to use Java to Python
